

Lake and pond construction

Design and build services for all types of water bodies.

- Large ponds and lakes
- Amenity and recreational lakes or ponds
- Wildlife ponds
- Environmental and educational ponds
- Balancing ponds and pollution control
- Reservoirs
- Fish farms
- Koi and ornamental ponds

Design

The A.G.A. Group can undertake all the aspects of pre-contract detailing work that ensure the long term success of the client's project. We take care to conform to all regulatory requirements and work with best practice construction methods.

Where necessary we will carry out feasibility studies, budget costing and concept design. We can format ecological restoration projects and provide erosion assessment and control solutions, and where necessary submit plans for approval.

We have a proven track record so talk to the A.G.A. Group, you will find we can provide the best solution.

Supply and Installation

Our resources enable us to supply the finest, cost effective materials that a project may require – geomembrane liners, geotextile protection/filter fabrics and bank stabilisation cells are just a few.

As the UK's largest producer of vegetated coir units for bio-engineering, the A.G.A. Group offers year round supplies for year round installation.

When you choose to use our professional, experienced, in-house installation team, you will have access to some of the most economical, innovative and reliable installation techniques available.

Joint partnership ventures and turnkey projects.

For over 25 years our group has had the most successful record of working with, and for, clients throughout the UK.

A.G.A. has close associations with the Environment Agency, local authorities, British Airport Authority, British Waterways, main contractors and private clients.

CONCEPT TO COMPLETION

The A.G.A. Group

A multi-disciplinary team that can offer a complete and integrated service.
We undertake the construction of water bodies of any size, large or small.
The group is the largest grower and installer of pre-vegetated coir units in the UK.

The A.G.A. Group's construction teams operate solely within the field of aquatic- and bio-engineering.

We operate a policy of 'Best Practice' and are bound by the Code of Conduct of both the Institute of Fisheries Management and the Institute of Biology.

The A.G.A. Group is validated by the nationally recognised 'SAFE CONTRACTORS SCHEME'

We have developed specialised techniques for construction and restoration projects that combine traditional and modern materials. In this way we are able to provide 'green' solutions even when hard engineering components are unavoidable.

For more information please contact us.

We can quote you for supply of materials and their installation or for turnkey projects.
